Existing Data	Registration prior to creation of dataaoRegistration prior to any human observation of the dataaoRegistration prior to accessing the dataaoRegistration prior to analysis of the dataaoRegistration following analysis of the dataExplanation of Existing Data If you indicate that you will be using some data that already exist in this study, please describe the steps you have taken to assure that you are unaware of any patterns or summary statistics in the data. This may include an explanation of how access to the data has been limited, who has observed the data, or how you have avoided observing any analysis of the specific data you will use in your study. The purpose of this question is to assure that the line between confirmatory and exploratory analysis is clear.e.g., links to prior papers, osf project page, prior posters or talks, or descriptions.Details of Larger StudyIs your preregistration part of a larger
----------------------	--

project?oYesoNo If yes, provide a brief description of the larger study. Note, this does not need to include a list of all measures included in the larger study, but it is meant to provide context for the larger scope of the project. fMRI preregistration template | Jessica FlanneryIf applicable,Link to OSF project page Link to collaborator's related preregistrations, posters, etc. Explanation of how information from larger study or related studies within the larger project have/have not influenced your hypotheses/ measurement decisions. Data Collection Procedures Please describe the process by which you will collect your data. For all tables, you can fill in the table or write paragraph below as you would for paper and use table as checklist of topics covered.PopulationRecruitment effortsInclusion/Exclusion criteriaClinical criteria (if applicable) Matching strategy (if applicable)Payment for participationIRB, consent/assent obtainedNumber of subjects participated and analyzedAge Sex
